Contents

Keynote papers (plenary session 1)

Paper 1  Prescription – a step on the road to dependence, or a cure for process safety ills?  
Page 1  P. Webb (Basell Polyolefins UK Ltd, UK)

Paper 2  Governance of process safety within a global energy company  
Page 11  M. McBride and G. Collinson (Centrica plc, UK)

Paper 3  Achievements of the EC Network of Excellence HYSAFE  
Page 22  T. Jordan et al. (Together with approximately 120 researchers from 25 institutions)

Paper 4  4 years on from Texas City  
Page 32  M.P. Broadrib and S.A. Flynn (BP International, UK)

Paper 5  ICI’s contribution to process safety  
Page 39  T.A. Kletz (Loughborough University, UK)

Safety management (session 2)

Paper 6  Common lessons learned from an analysis of multiple case histories  
Page 43  X. Yang, L. Dinh, D. Castellanos, C. Osorio, D. Ng and S. Mannan  
(Mary Kay O’Connor Process Safety Center, USA)

Paper 7  The Baker report – how findings have been used by Johnson Matthey to review their manufacturing operations  
Page 51  C.P. Lynas, E. Campbell and H.J. Koornhof (Johnson Matthey Catalysts)

Paper 8  Risks to process safety in a contracted out environment (contractors, consultants and corporate responsibility)  
Page 56  T. Ennis (Haztech Consultants Ltd, UK)

Paper 9  Process safety leadership, worker involvement, learning organisations and information flows  
Page 62  J. Wilday (Health and Safety Laboratory, UK), M. Kumasaki (Yokohama National University, Japan), J.L. Saw and C. Sugden (Health and Safety Laboratory, UK)

New process safety technology (session 3)

Paper 10  Explosion properties of nanopowders  
Page 70  P. Holbrow (Health and Safety Laboratory, UK)

Paper 11  A software system to check designs automatically against process safety and best practice  
Page 79  J. McDonald, B. Rieley, J. Madden, J. de Brugha (Hazid Technologies, UK) and P.W.H. Chung (Loughborough University, UK)

Paper 12  DART – the future of explosion protection technology  
Page 85  T. Klatt (Pepperl-Fuchs, Germany)

Paper 13  Nanotechnology: results of a survey of the public perception of safety  
Page 90  J. Wand (EPSRC, UK) and I. McConvey (UK)

Sharing safety knowledge (session 4)

Paper 14  Learning from successes and failures  
Page 95  R. Turney (Consultant, UK)

Paper 15  Accelerating learning through cross-sector peer reviews  
Page 99  G. Sellers (Safety Management Consultant, UK), D. Mason (Eskdale Limited, UK) and K. Hemmings
Paper 16  Learning from process safety incidents  
Page 104  J.A. Hare, M.P. Johnson (Health and Safety Laboratory, UK) and B. Fullam (Health and Safety Executive, UK)

Paper 17  Learning lessons from accidents: an industry view of the opportunities and difficulties  
Page 113  K. Patterson (Yule Catto & Co, UK)

HAZOP (session 5)

Paper 18  Introduction to session on Hazop: putting Hazop in context  
Page 118  T.A. Kletz (Loughborough University, UK)

Paper 19  Hazop studies – a new approach?  
Page 120  D. Limb (Nexen Inc., Canada)

Paper 20  Common problems and recent trends with Hazops  
Page 130  A. Munn (Aker Solutions, UK)

Paper 21  Improving the performance and consistency of Hazop facilitation and recording  
Page 134  A. Verna, S. Fernandez and G. Stevens (Arthur D. Little Limited, UK)

Paper 22  Is Hazop worth all the effort it takes?  
Page 143  S. Whitty and T. Foord (4-Sight Consulting, UK)

Safe process design (session 6)

Paper 23  Reducing the hazards associated with spray drying from laboratory through to larger scale including considerations for outsourcing and secondary containment  
Page 149  I. McConvey, M. Hoyle (AstraZeneca, UK) and O. Nulty (Containment Service Providers UK Ltd, UK)

Paper 24  Repeated accident causes – can we learn?  
Page 157  P. Waite (Entec UK Limited, UK)

Paper 25  Safety in design of thermal fluid heat transfer systems  
Page 162  T. Ennis (Haztech Consultants, UK)

Paper 26  A simple, swift and pragmatic approach in the use of small scale laboratory tests to define safe drying conditions for manufacturing scale pressure filters  
Page 170  K. Anderson, D. Maude and S. Wagner (AstraZeneca, UK)

Paper 27  The effect of reduced oxygen levels on the electrostatic ignition sensitivity of dusts  
Page 179  G. Ackroyd, M. Bailey and R. Mullins (Syngenta Process Hazards Section, UK)

Paper 28  Chemical reaction hazards – an evolving approach  
Page 185  D. Dale (Pfizer Global Research Division, UK)

Paper 29  Ignition of bulk solid materials by a localised hotspot  
Page 191  P. Caine, S.J. Puttick (Syngenta Process Hazards Section, UK), J. Brindley, A.C. McIntosh and J.F. Griffiths (University of Leeds, UK)

Safety performance indicators (session 7)

Paper 30  OECD guidance on safety performance indicators – an international approach to assessing the success of industry, public authorities and communities in managing major accident hazards  
Page 201  K. Jennings (Environmental Protection Agency, USA) and M. Hailwood (LUBW, Germany)

Paper 31  Developing KPIs that drive process safety improvement  
Page 207  M. Brown (Lloyds Register EMEA, UK)

Paper 32  Process safety performance indicators – experience gained from designing and implementing a system of PSPI’s for different chemical manufacturing operations  
Page 213  C.J. Beale (Ciba Expert Services, UK)
Paper 33  Determining process safety performance indicators for major accident hazards using site process hazard information
J. Fearnley and S.R. Nair (Aker Solutions, UK)

Paper 34  Safety performance indicators in the explosives sector
C. Sugden, N. Healey (Health and Safety Laboratory, UK), K. Howard and P. Rushton (Health and Safety Executive, UK)

Paper 35  Assessing the impact of ageing safety critical elements in offshore installations and how the ageing processes impact the role of SCEs to act as barriers to major accidents
K. Hart (Energy Institute, UK), G. Ersdal (Petroleum Safety Authority, Norway), J. Wintle, S. Smith (TWI Ltd., UK), J. Sharp (University of Cranfield, UK), D. Galbraith (Sigma Offshore Limited, UK) and E. Terry (Sauf Consulting Limited, UK)

Compliance with standards (session 8)

Paper 36  Lessons from re-licensing major hazard facilities in Victoria, Australia
G. Cooke (WorkSafe, Australia)

Paper 37  Area classification of natural gas installations
R.C. Santon and M.J. Irvings (Health and Safety Laboratory, UK)

Paper 38  Implementing EU industrial safety legislation in Central and Eastern Europe
P. Swords (PM Group, Ireland)

Paper 39  Cultural hazards: thoughts and experience to guide integration of corporate EHS standards in China and other countries
N.J.L. Gardner (Elementis plc, UK)

Paper 40  Hazards of high flash point liquids in relation to the ATEX 137 Directive
N. Allen (Chilworth Technology Ltd, UK)

Paper 41  Occupied buildings: building on our past improvements
J. Coates (UK Chemical Industries Association, UK) and K. Patterson (Yule Catto & Co plc, UK)

Paper 42  The preparation of a set of process safety procedures for a global chemical company
M. Brown (Huntsman, UK)

Risk assessment and analysis (session 9)

Paper 43  SIL determination and problems with the application of LOPA
A.G. King (ABB Engineering Services, UK)

Paper 44  A tool to estimate the failure rates of cross-country pipelines
G. Pettit (Sotera Risk Solutions) and B. Morgan (Morgan Safety Solutions)

Paper 45  Application of LOPA and SIL assessment to a new COMAH plant
J. Mullins (Abbott Risk Consulting, UK)

Paper 46  New UK pipeline risk assessment codes – IGEM TD/2 and PD 8010 Part 3
J.V. Haswell (Pipeline Integrity Engineers Ltd., UK), G.D. Goodfellow (Penspen Ltd., UK), N.W. Jackson (National Grid, UK) and R. McConnell (United Kingdom Onshore Pipeline Operators Association, UK)

Paper 47  Correcting the predictions by Baker-Strehlow-Tang (BST) model for the ground effect
Y. Xu, D. Worthington and A. Oke (DNV Software, UK)

Paper 48  Towards large eddy simulation of LNG pool fires
Z.B. Chen, S. Dembele, J.X. Wen and V.H.Y. Tam (Kingston University, UK)

Paper 49  Towards a computational fluid dynamics methodology for studies of large scale LNG releases
J.A. Melheim, M. Ichard (GexCon AS, Norway) and M. Pontiggia (Politecnico di Milano, Italy)
Safe process design (continued) (session 10)

Paper 50  Flame arresters for plants handling acetylene and ethylene oxide
Page 344  D. Long (Protego UK Ltd., UK) and
T. Heidermann (Braunschweiger Flammenfilter GmbH, Germany)

Paper 51  Inherently safer design – case study of rapid blow down on offshore platform
Page 349  V. Edwards (bpTT, Trinidad and Tobago),
A. Lyon and A. Bird (DNV Energy)

Paper 52  Mitigation of the lightning hazard for above ground hydrocarbon floating roof
storage tanks
Page 358  S. Haigh, P. Leichauer (Cobham Technical Services, UK),
M. Scanlon (Energy Institute, UK)
and B. Burrows (Brian Burrows Lightning Consultancies, UK)

Paper 53  Taking the control system for granted – ensuring the integrity of Sub-SIL
Page 365  instrumental functions
P. Lucas, J. Walkington and T. Atkinson (ABB Engineering Services, UK)

Paper 54  Mist fires and explosions – an incident survey
Page 370  R.C. Santon (Health and Safety Laboratory, UK)

Paper 55  Development and evaluation of experimental calorimetric systems for the simulation
of an external heat input on reactive chemicals and monomers
Page 375  L. Véchot, L. Casco, J. Hare (Health and Safety Laboratory, UK) and
M. Bishopp (Health and Safety Executive, UK)

Emerging energy technologies (session 11)

Paper 56  What is the overall global life cycle cost of a project in terms of SHE?
Page 385  F.K. Crawley (University of Strathclyde, UK)

Paper 57  A comparison of hazard and risks for carbon dioxide and natural gas pipelines
Page 392  J. Wilday, A. McGillivray (Health and Safety Laboratory, UK),
P. Harper (Health and Safety Executive, UK) and M. Wardman (Health and Safety Laboratory, UK)

Paper 58  Towards minimising hazards in hydrogen and fuel cell stationary applications: key
findings of modelling and experimental work in the HYPER project
Page 399  S. Brennan et al. (Together with 21 other researchers from nine institutions)

Paper 59  CO₂ pipeline systems: assessment of the risks and health & safety regulations
Page 411  I. Chrysostomidis, T.A.W. Geyer (Environmental Resources Management Limited, UK),
A. Smith (ERM Southwest Inc., USA), J. Fedorowick (ERM Northeast (US) &
Canada Inc., Canada), M. Bohm, E. Beynon (Suncor Energy Inc., Canada), C.T. Little (BP Alternative Energy, USA) and A. Lee (Chevron Corporation, USA)

Paper 60  Investigations into the effects of carbon dioxide and nitrogen on the flammability
limits of gas mixtures
Page 416  A.M. Thyer, J. Kay, S.E. Gant (Health and Safety Laboratory, UK) and
S. Connolly (Health and Safety Executive, UK)

Paper 61  CO₂ pipelines material and safety considerations
Page 423  M. Bilio (Health and Safety Executive, UK), S. Brown (University College London, UK),
M. Fairweather (University of Leeds, UK) and
H. Mahgerefteh (University College London, UK)

Human factors and behaviour (session 12)

Paper 62  Looking across industries to improve human reliability data for quantitative
risk analyses
Page 430  R. Schneider (The Center for Chemical Process Safety, USA)
Paper 63  A practical application of ‘human-hazop’ for critical procedures
Page 434  G.R. Ellis (ABB Engineering Services, UK) and
A. Holt (Chemtura Manufacturing Ltd, UK)

Paper 64  A human factors approach to managing competency in handling process control
Page 440  disturbances
D. Embrey (Human Reliability Associates Ltd, UK)

Paper 65  Development of a process safety climate tool
Page 447  C. Butler, C. Lekka and C. Sugden (Health and Safety Laboratory, UK)

Paper 66  Maintaining a strong safety culture in a development facility with rapid changeover
Page 455  and major accident potential
S.J. Harding, B.L. Fox, S.D. Whittingham and C.F. Blyth (AstraZeneca, UK)

Paper 67  Equipping the next generation – risk management training
Page 462  P. Ackroyd (Greenstreet Berman, UK), S. Wisniewski (Wizard Associates Ltd),
N. Eden (AstraZeneca, UK), K. Williams (Syngenta International AG)
and G. Gibson (Magnox Generation)

Risk assessment and analysis (continued) (session 13)

Paper 68  Retrospective hazard identification and assessment of ageing plant
Page 468  M. McBride (Centrica plc, UK), C. Marsh (Centrica Storage Ltd, UK), I. Herbert
(ABB Engineering Services, UK) and C. Robinson (Vectra Group Ltd, UK)

Paper 69  A semantic approach for incident database development
Page 477  R. Batres (Toyohashi University of Technology, Japan),
Y. Shimada (National Institute of Occupational Safety and Health, Japan) and
T. Fuchino (Tokyo Institute of Technology, Japan)

Paper 70  Comparison of the subsurface migration of LPG and natural gas
Page 485  R. Bettis and J. Fletcher (Health and Safety Laboratory, UK)

Paper 71  Recent developments in the use of societal risk assessment for land use planning for UK
Page 492  non-nuclear, on-shore major hazard installations
K. O’Donnell (Health and Safety Executive, UK)

Paper 72  Interpretation of overpressure markers and directional indicators in full-scale deflagrations
Page 500  and detonations
G. Atkinson, L. Cusco (Health and Safety Laboratory, UK),
D. Painter (Health and Safety Executive, UK) and V. Tam (BP, UK)

Paper 73  Using predictive risk assessments to develop user-friendly tools for on- and off-site
Page 507  emergency planning
J. Fearnley and S.R. Nair (Aker Solutions, UK)

Human factors and behaviour (continued) (session 14)

Paper 74  Links in the chain – a new paradigm for thinking about safety
Page 514  D. Irvine (Epiphanies LLP, UK) and G. Sibbick (Centrica Storage, UK)

Paper 75  The human elements of a nuclear accident
Page 524  K. Hemmings (Sellafield, UK)

Paper 76  Process safety fundamentals training for first level leaders
Page 529  U. Bruyere (BP International, UK), M. Fox (Kineo, UK)
and C. Watson (Watson Integrity Ltd., UK)

Paper 77  To err is human – a case study of error prevention in process isolations
Page 536  R. Lardner (The Keil Centre Ltd, UK) and J. Maitland (BP Exploration and Production, UK)

Paper 78  Safety culture: cornerstone of the nuclear safety case
Page 542  R. Cullen (Po¨ yry Energy, UK)
Human error analysis at a refinery
J. Gould and S. Lovell (Environmental Resources Management (ERM), UK)

Human failure in the assessment of major hazard risk: a case study for the human factors
Safety critical task analysis (HFSCTA) methodology
C. Hill, L. Butterworth (Human Engineering Ltd, UK) and S. Murphy (Syngenta, UK)

Safety management (continued) (session 15)

Delivery of a global control of work system
R. Morgan (BP plc Lubricants, UK) and M. Carter (RAP International, UK)

Safety in the oil and gas industries in Qatar
M.S. Mannan (Texas A&M University, USA), T. Olewski and S. Waldrum (Texas A&M University, Qatar)

Implementing improvements in process safety in Corus
A. Ormond (ABB Engineering Services, UK) and M. de Klerk (Corus, UK)

Corrosion management offshore – resolving the problems and complying with the law
T. Holmes (Health and Safety Laboratory, UK), S. Connolly (Health and Safety Executive, UK), J. Wilday, J. Hare and P. Walsh (Health and Safety Laboratory, UK)

Consideration of the effectiveness of the safety management system in QRA calculations
A. Acikalin (BAM Federal Institute for Material Research and Testing, Berlin)

Risk assessment and analysis (continued) (session 16)

Modelling the dispersion of spills in buildings
S. Puttick (Syngenta, UK)

Two-phase jet releases and droplet dispersion: scaled and large-scale experiments, droplet size correlation development and model validation

Real time followup of leaks and dispersion accidents
S. Tripathi, L. Ait Hamou, M. LeGuellec and C. Souprayen (Fluidyn)

Numerical study of large scale hydrogen explosions and detonation
V.C. Madhav Rao, A. Heidari, J.X. Wen and V.H.Y. Tam (Kingston University, UK)

Leak frequency modelling for offshore QRA based on the hydrocarbon release database
A. Falck (DNV Energy, Norway), B. Bain (DNV Energy, UK) and L.K. Rødsætre (StatoilHydro ASA, Norway)

A software model for assessing fatality risk from explosion hazards using the multi energy method and Baker Strehlow Tang approach
N. Cavanagh, Y. Xu and D. Worthington (DNV Software, UK)

Quantifying the tolerability of potential ignition sources from uncertified mechanical equipment installed in hazardous areas
S. Sherwen (ABB Engineering Services, UK)

Plenary (session 17)

A technical analysis of the Buncefield explosion and fire
M.S. Mannan (Texas A&M University, USA)

ICL Plastics: the lessons from the tragedy
A. Tyldesley (Haztech Consultants Ltd, UK)
Paper 96  ICL Plastics investigation, Glasgow, May 2004  
S.J. Hawksworth, D. Pritchard, J. Hodges, R. Parrot, G. White and 
T. Mellor (Health and Safety Laboratory, UK) 

Paper 97  The management of risk – an evolutionary system that improves safety 
John Bond 

Poster presentations 

Paper 98  Practical process safety management in chemical manufacturing 
A.H.K. Fowler (HFL Risk Services Ltd, UK), I. Walker and R. Wall (Nufarm Ltd, UK) 
Page 693 

Paper 99  Chemical reaction hazards of distillation processes 
G. Arthur, C. Williams (Syngenta, UK) and M. Luginbuehl (Syngenta Crop Protection, 
Germany) 
Page 700 

Paper 100  ‘Good safety’ – a cost to the business or a positive benefit to the bottom line…? 
C.V. Lakin (Artenius UK, UK) 
Page 704 

Paper 101  Safety feedback – the real thing 
E. Doval (University ‘Spiru Haret’, Romania) and S. Kovacs (INCDPM, Romania) 
Page 708 

Paper 102  Improving the understanding of process safety management 
R. Turney and I. Thorpe (Consultants, UK) 
Page 715 

Paper 103  Risk assessment for major hazards and project evaluation – assessing thermal risks in 
subsea production operations 
P. Ellerton and C. Chauvet (Prospect, UK) 
Page 720 

Paper 104  Risk management in the operations of a subsea pipeline 
G. McIntosh (iicorr Ltd, UK) 
Page 724 

Paper 105  The assessment of major accident risks in Tallinn (Estonia) 
Ö. Paas, P. Tint and M. Järvis (Tallinn University of Technology, Estonia) 
Page 729 

Paper 106  Inherently safer design activities over the past decade 
P.R. Amyotte (Dalhousie University, Canada), F.I. Khan (Memorial University, Canada) 
and T.A. Kletz (Loughborough University, UK) 
Page 736
