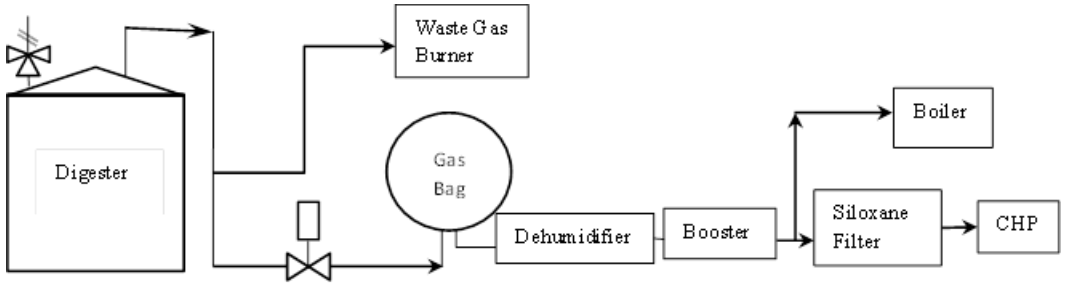
Biogas process safety challenge



Process safety risk assessment helps in understanding the gaps between the asset and Corporate objective of Zero Harm , Incident and Zero Compromise. Risk Assessment a team approach has been taken.

Team will have 3 defined roles	•Forward, Midfield & Defender
Process safety also have 3 defined roles	•Design ,Operate and Maintain
Who are the opponents	•Fire, Explosion, Toxic Gas , Corrosion, Explosion, Spillage ....

The understanding of process safety barriers clearly help in creating process safety culture, align funding to high risk and creates safety as a team culture to help to achieve the corporate commitment of zero harm, zero compromise and zero incident.
