

Get your training approved by IChemE

Independent approval of training and learning programmes

One of IChemE's primary objectives is to improve standards, knowledge, skills and excellence in the chemical and process industries. To help achieve this aim we share our expertise to assess and accredit training courses and many other types of learning which improve professional standards. Full details about this service are available online at www.icheme.org/approvedtraining

Standard training approval service features

Peer review and feedback, full accreditation for three years, IChemE brand endorsement, course certificates, CPD hours allocation and confidentiality agreements are all standard.

Who can use the service?

Our training approval service is available globally and suitable for training providers, universities, colleges of further education and employers.

What can be approved?

Most training courses and professional development programmes are suitable for approval, including open and online training, in-house learning and webinars.

Why get your training approved by IChemE?

IChemE accreditation independently benchmarks against international standards, demonstrates quality of training, enhances reputation and supports commercial goals.

The training approval peer review process

The training approval process can take as little as 4—8 weeks if the course content meets the required standard after a single peer review phase and appropriately knowledgeable peer reviewers are immediately available.

Optional marketing services

Once approved you can access an optional range of marketing services including listings in our online shop, catalogue, promotion to IChemE members and more.

Countries and territories

IChemE training approval is an international service.

How to apply

Download an information brochure and application form on our how to apply page. Discounts are available if seeking approval for multiple courses and territories.
