

Drax Power Station site visit

6 September 2019

IChemE's Hull & Humber Members Group invites you to attend their site visit to the Drax Power Station.

At Drax Power Station you will see every part of how electricity generation is done and find out how they're upgrading to the latest biomass technology. This means they can use sustainable compressed wood pellets instead of coal, which cuts carbon footprint by 80%. Expert guides with years of experience will be on hand at this tour.

The site visit will include an interactive session and guided walks inside the very heart of the station. The tour will last for 2 - 2.5 hours and due to the nature of the operational site, Drax is unable to offer disabled access for this tour.

Time: 18:15 - 20:30

Location: Drax Power Station, Drax, Selby, YO8 8PH

Cost: Free of charge, open to all

Registration: www.icheme.org/hullhumber-draxtour
