

Mixing and crystallisation

Joint event organised by the Fluid Mixing and Pharma subject groups of IChemE

DATE: 20th September 2019

PRICE: £50 (£30 for students)

VENUE: City and Guilds Building (CAGB) 309, Imperial College London, South Kensington, SW7 2AZ

Call for abstracts

We are inviting speakers to offer abstracts for consideration on the subject of mixing and crystallisation. Abstracts should be at most one page long. They should include title, name and contact details of authors, their affiliation, and a description of the work to be presented.

What we are looking for

The event is aiming to educate the attendees on recent developments (computational and experimental) on mixing, crystallisation and their interaction. We expect that the programme will consist of 8-9 speakers. The audience will be mostly academics, PhD students and practicing professional engineers.

How to submit an abstract.

The abstracts should be submitted to Dr George Papadakis (g.papadakis@ic.ac.uk) and Dr Stelios Rigopoulos (s.rigopoulos@ic.ac.uk) by 30th June 2019. All submissions will be acknowledged, and speakers will be advised by 7th July 2019 whether their abstract has been accepted.
