

LNG & Alternative Fuels for Shipping

4 February 2020

Since carbon footprint regulations have been tightening and experience is advancing beyond LNG carriers, LNG is becoming a trending alternative (from fuel oil) as marine fuel to power tankers, cargo vessels and cruise liners. This subject is one that spans the process, mechanical & marine industries.

This seminar will cover the current state of play and future plans for a broad range of topics, including: Fuel supply, storage & bunkering; engine technology and conversion; environmental impact, safety & regulation; crew (re-)training; supply chain economics

Confirmed speakers:

Peter Kirkeby, MAN Energy Solutions
Margaret Mistry, Equinor
Paul Kirchner, Aker Solutions
Jostein Ueland, Dreifa
Dr Jack Sharples, Oxford Institute of Energy
Stephen Brown, Shell Shipping & Maritime
Mark Penfold, American Bureau of Shipping
Sjaak Klap, Society of Gas as a Marine Fuel

Time: 9:00 - 16:00 GMT

Location: IMechE, 1 Birdcage Walk, London, SW1H 9JJ

Cost: IChemE SONG SIG Members / IMechE Process Division Members - £120.00
Others - £150.00
Concessions (students/retirees) - £60.00
