

Event description

Hazards 30 is IChemE's annual process safety conference, the leading event of its kind in Europe. This industry-focused event will explore every major aspect of process safety and help you to learn from the experience of others. It takes place on 30 November–2 December 2020 in Manchester, UK.

Join us to stay up to date with process safety good practice, discover new techniques and approaches, explore lessons learned from past incidents and near-misses, and network with the international process safety community.

Hazards 30 will mark 60 years since Hazards was first held in 1960, also in Manchester. Since then, Hazards has grown in size and influence, continuing to be at the forefront of sharing new knowledge and disseminating good process safety practice across the process industries and beyond.

Featuring an excellent speaker line-up, extensive technical programme, trade exhibition, workshop sessions, and social and networking opportunities, Hazards 30 is the ideal event for anyone involved in process safety and risk management.
