

Technical Symposium: Ageing Plants

8 November 2018

Do you work with ageing process kit and are you interested in learning more about how to maintain safe and reliable operations? If yes, then join us for our symposium. Organised by local IChemE Hull & Humber committee. Presentations by regulators, industry experts, consultants and academics.

One of the most significant aspects of the role of an engineer working in an ageing plant is to maintain high levels of reliability and adhere to the highest standards of safety while meeting production requirements. We will discuss equipment deterioration mechanisms, management of ageing assets, evolving regulations and good practices and remediation measures.

We have confirmed speakers from ABB, BP and Phillips 66 Ltd. A full program will be shared with you nearer the date.

The day will include presentations from experts in the field, and time for networking and discussions on specific questions.

Time: 09:00-15:00

Location: Royal Hotel Hull, 170 Ferensway, Hull HU1 3UF

Cost: including VAT

IChemE members - £60.00

Non-members - £80.00

Students - £25.00 we only have a limited number of student places available.
