

# Webinar: Industry Insights

IChemE ADVANCING  
CHEMICAL  
ENGINEERING  
WORLDWIDE

London & South East Coast  
Young Members Group

Tuesday 23<sup>rd</sup> November, 7:00-8:30pm.  
Online Webinar

**Nitesh Patel** graduated with a masters degree in Chemical Engineering with a professional placement from Aston University.

He spent 7 years working at AkzoNobel in various roles within Supply Chain, R&D and Engineering.

He is currently at Britvic Soft Drinks where in the last 4 years his role has involved NPD, Reformulation, Value Engineering, Scale-up Implementation & Project Management.

He has recently become a STEM ambassador and is in the process of gaining Chartered status with the IChemE.

**Despoina Moschou** holds an MSc in Advanced Chemical Engineering with Process Systems Engineering (PSE) from Imperial College of London.

Her area of expertise is Mathematical Modelling and Optimisation.

She is working as a Senior Consultant in Decision Lab, a London based software company specialized in the development of decision-making tools for clients in the defence, utilities and manufacturing industries.

Despoina's current areas of interest include Machine Learning and Data Science.

**Azam Hosseini** is a chartered engineer with a masters degree in Chemical Engineering.

She has 18 years of experiences in Oil & Gas and Renewables. Her time in the industry has seen her develop many projects all the way from Concept-Select, FEED, Detailed Design and On-Site Commissioning and Start-up of Gas Processing Plants.

Azam has several years of experience in designing and developing subsea, offshore and onshore plants, LNG plants, CCUS and Hydrogen system.

Attendance is free and open-to-all - please register at:
