

Dynamic Project Management with Cost and Schedule Risk

15 October 2018

Following a well-received 2017 event organised by the Hull & Humber Member Group, London & SE Member Group, along with the IMechE, have arranged a similar event for our London-based membership.

Engineers in their project management roles developing new industrial processes, designing new plant and equipment, or modifying existing ones, are exposed to big major sources of risk, cost and time.

This seminar clarifies how engineers can perform quantitative risk analysis and leverage their skills to analyse project management risk on cost and time.

Time: 18:00-21:00

Location: One Birdcage Walk, Manufacturing Room, first floor, Westminster, London SW1H 9JJ

Cost: Free of charge, IChemE & IMechE members only.
Registration: www.icheme.org/lsemg-risk-registration

Webpage: www.icheme.org/lsemg-risk
