

Dynamic Project Management with Cost and Schedule Risk Seminar

Speak Biographies:

Dr. Elvis Hernandez-Perdomo

Dr Elvis Hernandez has over seventeen years of experience in risk management. Formerly Central Banker's Economist, founder and executive director of a Latin-America consulting firm, and Senior Executive Consultant/Trainer at Real Options Valuations, Inc. (ROV) working on real options, risk management, Monte Carlo Risk Simulation, optimisation, and business intelligence analytics.

Dr Hernandez has participated in several international consulting projects in Portugal, Spain, U.S., Latin America (i.e., Brazil, Venezuela, Colombia, Ecuador, Chile, Guatemala, Argentina, etc.), and the UK. Elvis has also implemented top level of executive programs in Decision Making, Risk Management and Strategic Options for board of directors, managers, analysts, and senior professionals in government agencies, oil and gas companies, telecommunications companies, Banks, and SMEs.

He has a PhD in Finance, and a PhD in Engineering Science, where his research and academic interests are in Corporate Governance, Multi-criteria Decision Analysis, Risk Management, Valuations and Real Options. He is an Economist (Magna-Cum-Laude), with an MSc. in Statistics and Operations Research and MSc. in Finance with honours, Certified in Quantitative Risk (CQRM) by the IIPER (member of the prestigious AACSB), and an Associate in Business ERP by SAP Corporation.

Elvis belongs to the Academy of Higher Education in the UK as an Associate Fellow. He is also a member of the Portuguese Economic Association, and Visiting Professor in risk management, real options valuations, and decision-making modules in some international universities. Finally, he has written relevant academic articles published in international peer-review journals in reliability systems, central banking, engineering, risk, uncertainty, and so forth.
