

Global Awards 2022

Celebrating Chemical Engineering Excellence

Entry guide

Deadline for submissions: 15 July 2022

www.icheme.org/globalawards

About the IChemE Global Awards

Now in their 29th year, the IChemE Global Awards are open for entries and recognise chemical engineering's best people, projects and companies worldwide.

With 19 categories covering every major aspect of chemical and process engineering and a range of industry sectors, this is a great opportunity for you or your team to be recognised for your hard work and outstanding achievements.

Deadline for submissions is **Friday 15 July 2022**.

Winners will be revealed at our awards dinner to be held on Friday 17 November 2022 in Manchester, UK, with the Outstanding Achievement Award presented to the best overall entry.

Top tips on how to make your entry stand out from the crowd:

Read the entry form carefully

Always make sure you answer the question that is being asked. The entry form is designed to support the scoring model used by our judging panel. Stick to the word count limit.

Make sure you're eligible

The IChemE Global Awards are open to members and non-members but if you're based in Malaysia, or the primary benefits of your work are derived in this country, you should enter our national award programme. National award winners automatically qualify as Global Awards finalists.

Understand the scoring process

All entries are scored by a judging panel of subject matter experts. Judges look for evidence in five areas:

- Engineering/Professional Excellence
- Evidence of Application
- Process Safety
- Societal Benefit
- Sustainability/Environmental Benefit

Benefits, evidence, and even more benefits

The best entries are always full of benefits and evidence. Data such as cost and efficiency savings, increased production, waste reduction, capacity improvements, skills development, customer feedback, sales and commercial success will likely impress the judges and score highly. Entries that demonstrate what you have achieved are always likely to score more highly than entries telling us what you plan to do in the future.

Double your chances

You can submit your entry for up to two categories (excluding 'Young Industrialist' and 'Young Researcher'). In some circumstances judges may use their discretion and place your submission into another category.

Keep it simple

All our judges are specialists in their fields, but you can help our panel by following the guidelines below when writing your entry:

- keep sentences short
- use simple, everyday English
- use lists and bullets
- limit the use of acronyms and make sure they're defined when first used.

Quality not quantity

Our word count limits make it simpler to apply, ensure consistency across all entries and help our judges assess all the entry forms in a timely manner. Many successful entries don't reach the limit though so consider the quality of your entry, not just the quantity.

What's new

Some of the best entries we receive are those that demonstrate incremental improvements to existing plant, process or projects, some of which may have been recognised previously in the IChemE Global Awards. If you're planning an entry that builds upon a previous submission, make sure you clearly demonstrate what's changed since last time.

Don't forget the deadline

The deadline for submissions is **Friday 15 July 2022** so make sure you leave enough time to get sign-off internally and input from partners and colleagues.

Great reasons to enter

The IChemE Global Awards:

- are considered the world's most prestigious chemical engineering awards
- offer a variety of categories for all fields and levels of chemical engineering
- are free to enter and open to both IChemE members and non-members
- are judged by senior figures in chemical and process industries and members of IChemE
- are a great way to enhance your reputation and demonstrate your achievements throughout the chemical and process engineering community.

How to enter?

- Choose the categories you'd like to enter
- Download an entry form at www.icheme.org/globalawards
- Complete all sections and your entry checklist
- Ensure all organisations involved in your project are included in your entry
- Make sure you have permission from your organisation/partners
- Submit your entry form/s to awards@icheme.org by Friday 15 July

Interested in sponsoring?

We have sponsorship packages to suit all budgets, all providing excellent opportunities to highlight your brand throughout 2022. If you are interested in sponsoring this year's awards, please check our sponsorship guide at www.icheme.org/globalawards or contact ichemeevents@media-shed.co.uk.
