- Grewer, Th. and Klais, O., Pressure rise during homogeneous decomposition and deflagration 1
- H
- Hankinson, G. (See Cook, D.K.) 289
- hazards 11, 37
- Hazop 301
- heatflow 85
- heat transfer 315
- Heat transfer from exothermically reacting fluid in vertical unstirred vessels, Bourne, J.R., Brogli, F., Hoch, F. and Regenass, W. 315
- Henderson, D.K. (See Tyler, B.J.) 45
- Hoch, F. (See Bourne, J.R.) 315
- homogeneous decomposition 1
- hydrogenation 25

I
 incineration 201
 inclined 289
 Isothermal heat flow calorimeter, Wright, T.K. and Butterworth, C.W. 85

J
 Jagger, S.F. (See Moodie, K.) 215
 jet/plume dispersion 215

K
 kinetics 85
 Klais, O. (See Grewer, Th.) 1
 Klais, O., Methane formation during hydrogenation reactions in the presence of Raney nickel catalyst 25
 Klein, H.H., Computer model for sizing two-phase emergency relief systems, validated against DIERS large scale test data 143

L
 Leakage through cracks: the applicability of available prediction methods, Friedel, L. and Westphal, F. 265
 leak rate 265
 liquified gases 247
 LPG 215

M
 Maddison, N. (See Gibson, N.) 157
 Margetts, A.J., Procedures for the safety assessment of programmable logic controllers used for reactor trip systems 301
 Methane formation during hydrogenation reactions in the presence of Raney nickel catalyst, Klais, O. 25
 model 265
 Moodie, K. (See Bettis, R.J.) 247
 Moodie, K. and Jagger, S.F., Flow through pressure relief devices and the dispersion of the discharge 215

N
 Nolan, P.F. (See Bettis, R.J.) 247
 P.F. (See Cronin, J.L.) 113
 non-foamy liquid disengagement 143

O
 O'Brien, K. (See Cook, D.K.) 289

P
 PES's 301
 PLC's 301
 predictive accuracy 265
 pressure release 247
 Pressure relief and venting: some practical considerations related to hazard control, Fauske, H.K. 133

pressure rise 1
 Pressure rise during homogeneous decomposition and deflagration, Grewer, Th. and Klais, O. 1
 Procedures for the safety assessment of programmable logic controllers used for reactor trip systems, Margetts, A.J. 301
 process control 61

R
 Raney nickel catalyst 25
 reaction calorimeter 85
 reactor 157, 175
 reactors 133
 reactor safety 61
 relief 133, 157, 175, 187
 relief valves 215
 Rogers, R.L. (See Gibson, N.) 61, 157
 runaway 157
 runaway potential 113
 runaway reaction 25

S
 Safe disposal of relief discharges, Burgoyne, J.H. 201
 safety assessment 301
 self-heating 45
 Simple method of estimating exothermicity by average bond energy summation, Craven, A.D. 97
 software 301
 spontaneous decomposition 11
 spontaneous ignition 45
 Spontaneous ignitions in dust layers: comparison of experimental and calculated values, Tyler, B.J. and Henderson, D.K. 45
 statistical analysis 265
 strategy 113
 Strategy for thermal hazards assessment in batch chemical manufacturing, Cronin, J.L., Nolan, P.F. and Barton, J.A. 113

T
 task analysis 301
 test methods 113
 theoretical model 289
 thermal decompositions 113
 thermal explosion 315
 thermodynamics 97
 two-phase 143, 175, 187, 247
 Two phase flashing releases following rapid depressurisation due to vessel failure, Bettis, R.J., Nolan, P.F. and Moodie, K. 247
 two-phase flow 133
 Tyler, B.J. and Henderson, D.K., Spontaneous ignitions in dust layers: comparison of experimental and calculated values 45

U

unstable substances 37
unstirred vessels 315
Use of DIERS methods for two-phase relief of vaporisers,
Wilday, A.J. 187

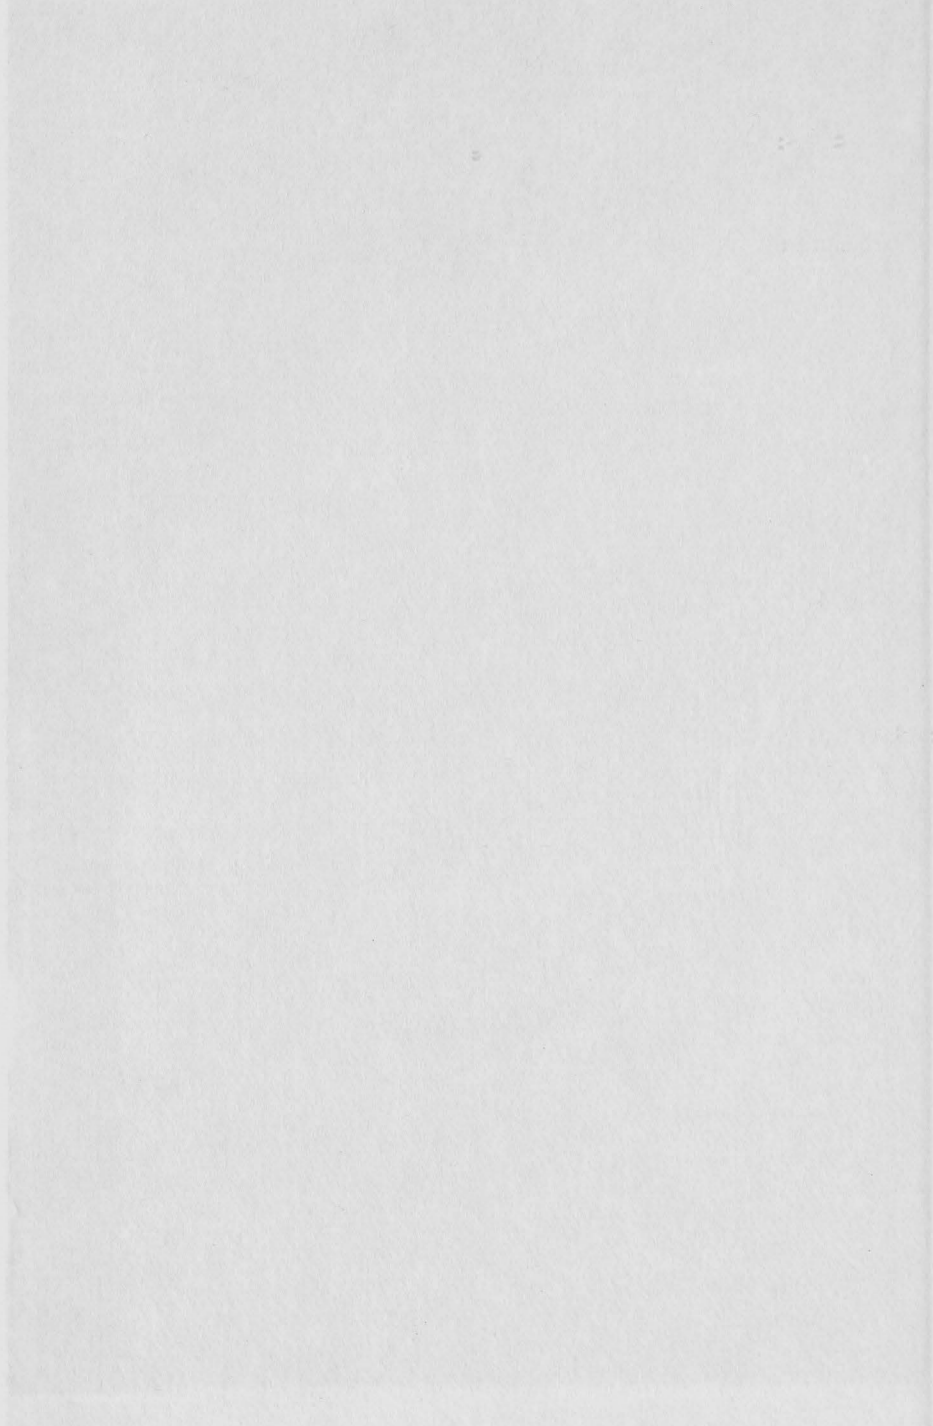

V

vaporiser 187
vapour/liquid flow 215
venting 133, 157, 215
vents 61

W

Westphal, F. (See Friedel, L.) 265
Wilday, A.J., Use of DIERS methods for two-phase relief of
vaporisers 187
Wright, T.K. (See Gibson, N.) 61
Wright, T.K. and Butterworth, C.W., Isothermal heat flow
calorimeter 85
