About the Malaysia Awards

Celebrating chemical engineering excellence

The IChemE Awards celebrate chemical, process and biochemical engineering excellence.

Established in 1994, the awards attract interest from all over the globe and are widely recognized as the world's most prestigious chemical engineering awards. The first IChemE Awards – originally called the Excellence in Safety and Environment Awards – were held on 23 March 1994 at the National Motorcycle Museum in Birmingham, UK.

The IChemE Singapore Awards and IChemE North America Awards were established in 2012, followed by the IChemE Malaysia Awards in 2013.

In 2020, 2021 and 2022 the Malaysia Awards were presented at virtual events. The 2024 Awards Ceremony will likely mark the largest gathering of chemical and process engineers in Malaysia in over five years.

Award categories

Best Consultancy

Recognises the individual, organisation, or group that best demonstrates the provision of outstanding consultancy services within the chemical engineering community.

Industry Project

Recognises the best chemical engineering project, undertaken in the last four years, to be implemented in industry. This includes, but is not limited to, construction of new plant and the adaptation of existing facilities.

Oil and Gas

Recognises the best project, process or product to demonstrate chemical engineering excellence in the oil and gas sector.

Process Automation & Digitalisation

Recognises the best project, process or product to demonstrate excellence in the application of process automation and/or digitalisation within the chemical and process industries.

Process Safety

Recognises the project, process or product to best demonstrate excellence in process safety.

Research Project

Recognises the best chemical engineering research project, undertaken in the last four years. Entries should demonstrate potential or actual application in industry and are welcomed from industry, academia and collaborative working groups.

NEW Renewable Energy

Recognises the best project, process or product that demonstrates excellence in the development and use of renewable energy generation and storage in the chemical and process industries.

Young Researcher

Recognises the chemical engineer who best demonstrates the impact of their chemical engineering research to address important technical, economic, environmental or social issues. All entrants must have been born on or after 1 January 1994.

The proposed award categories may be subject to change, depending on the circumstances. Contact malaysiaawards@icheme.org for more information.

Sponsor packages
