

Hydrogen Innovation and Technology Conference

14–15 October 2026, Manchester, UK

Sponsorship and exhibition packages

Hydrogen: moving from ambition to action

As global strategies mature and investment accelerates across production, infrastructure, and end-use applications, 2026 will be a defining year for the hydrogen economy. The *Hydrogen Innovation and Technology Conference* will bring together the leaders, innovators, policymakers, and technical experts driving hydrogen forward across transport, industry, infrastructure, and the wider net zero transition. This is where real deployment is showcased, breakthrough research is shared, and the next wave of commercial opportunity takes shape.

For organisations working in technology, engineering, policy, investment, R&D or project delivery, this event will offer direct access to decision-makers, partners and customers shaping the future hydrogen landscape. Part of a strategic alliance between Institution of Chemical Engineers (IChemE) and American Institute of Chemical Engineers (AIChE), the conference supports the global adoption of hydrogen as a clean energy carrier for industry and transportation, advancing the transition to net zero.

Why sponsor or exhibit?

Sponsoring or exhibiting at the *Hydrogen Innovation and Technology Conference* will enable you to:

- generate new, high-quality business leads
- raise brand visibility among an engaged, specialist audience
- demonstrate thought leadership and commitment to best practice
- strengthen relationships with existing clients and partners
- position your organisation at the forefront of hydrogen deployment.

Whatever your objectives, we will work with you to maximise your return on investment. For the latest event information, visit: www.icheme.org/hydrogen26
