

How to Stop Pipeline Gas Leaks Now!

4 March 2019

A one-hour webinar presentation reviewing leak detection technology developed at Air Products that is used for real-time monitoring of carbon monoxide and hydrogen pipelines.

Presenter, Dr. George Harriott, is a recognised expert at Air Products where he has worked for 35 years on a wide range of technologies: pipeline dynamics, gas separation, process design, equilibrium instabilities and applied cryogenics. He received a BSE from Princeton University and a PhD from MIT, both in Chemical Engineering.

Time: 18:00 - 19:00 GMT / 12:00 - 13:00 CST

Location: Online

Cost: Free & open to all

Registration: www.icheme.org/usmg-webinar-gasleaks
